

千万不要以为开头一样,是我老眼昏花,又发了一个凑数。

本篇为开发调试高级篇

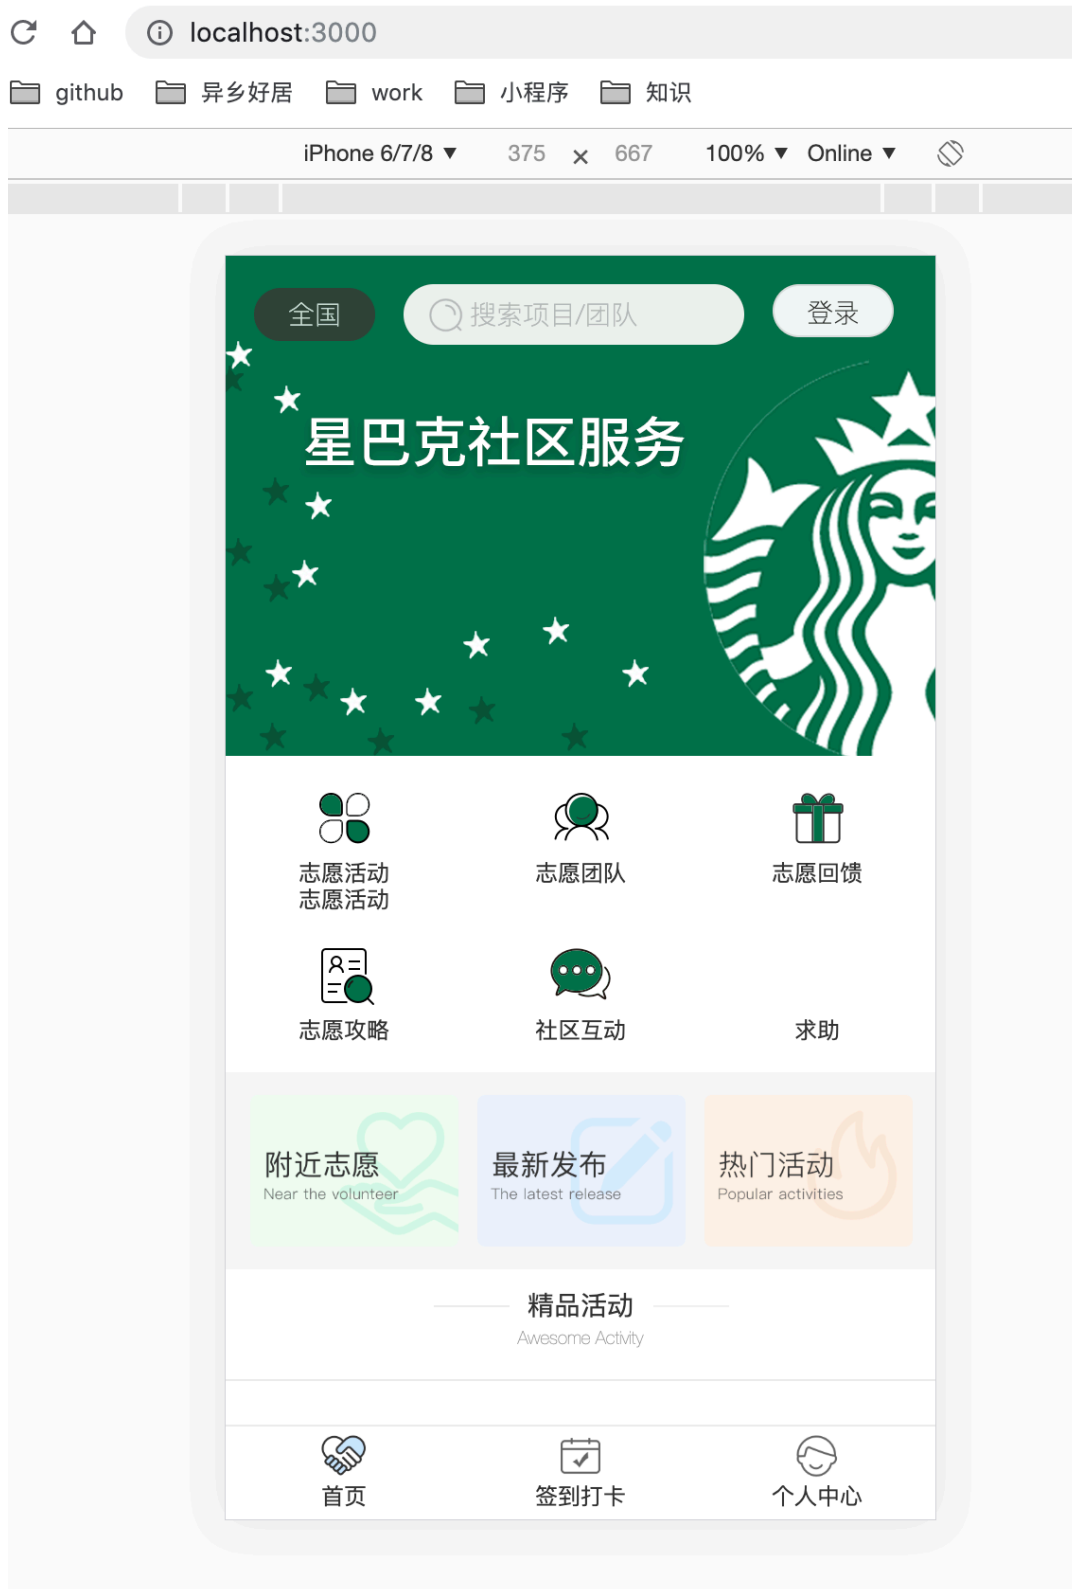

测试连接: <https://wx8b7f9e8dc8e839cb.wechat.volzdx.cn>

快速解决线上问题,解决h5页面没用控制台问题

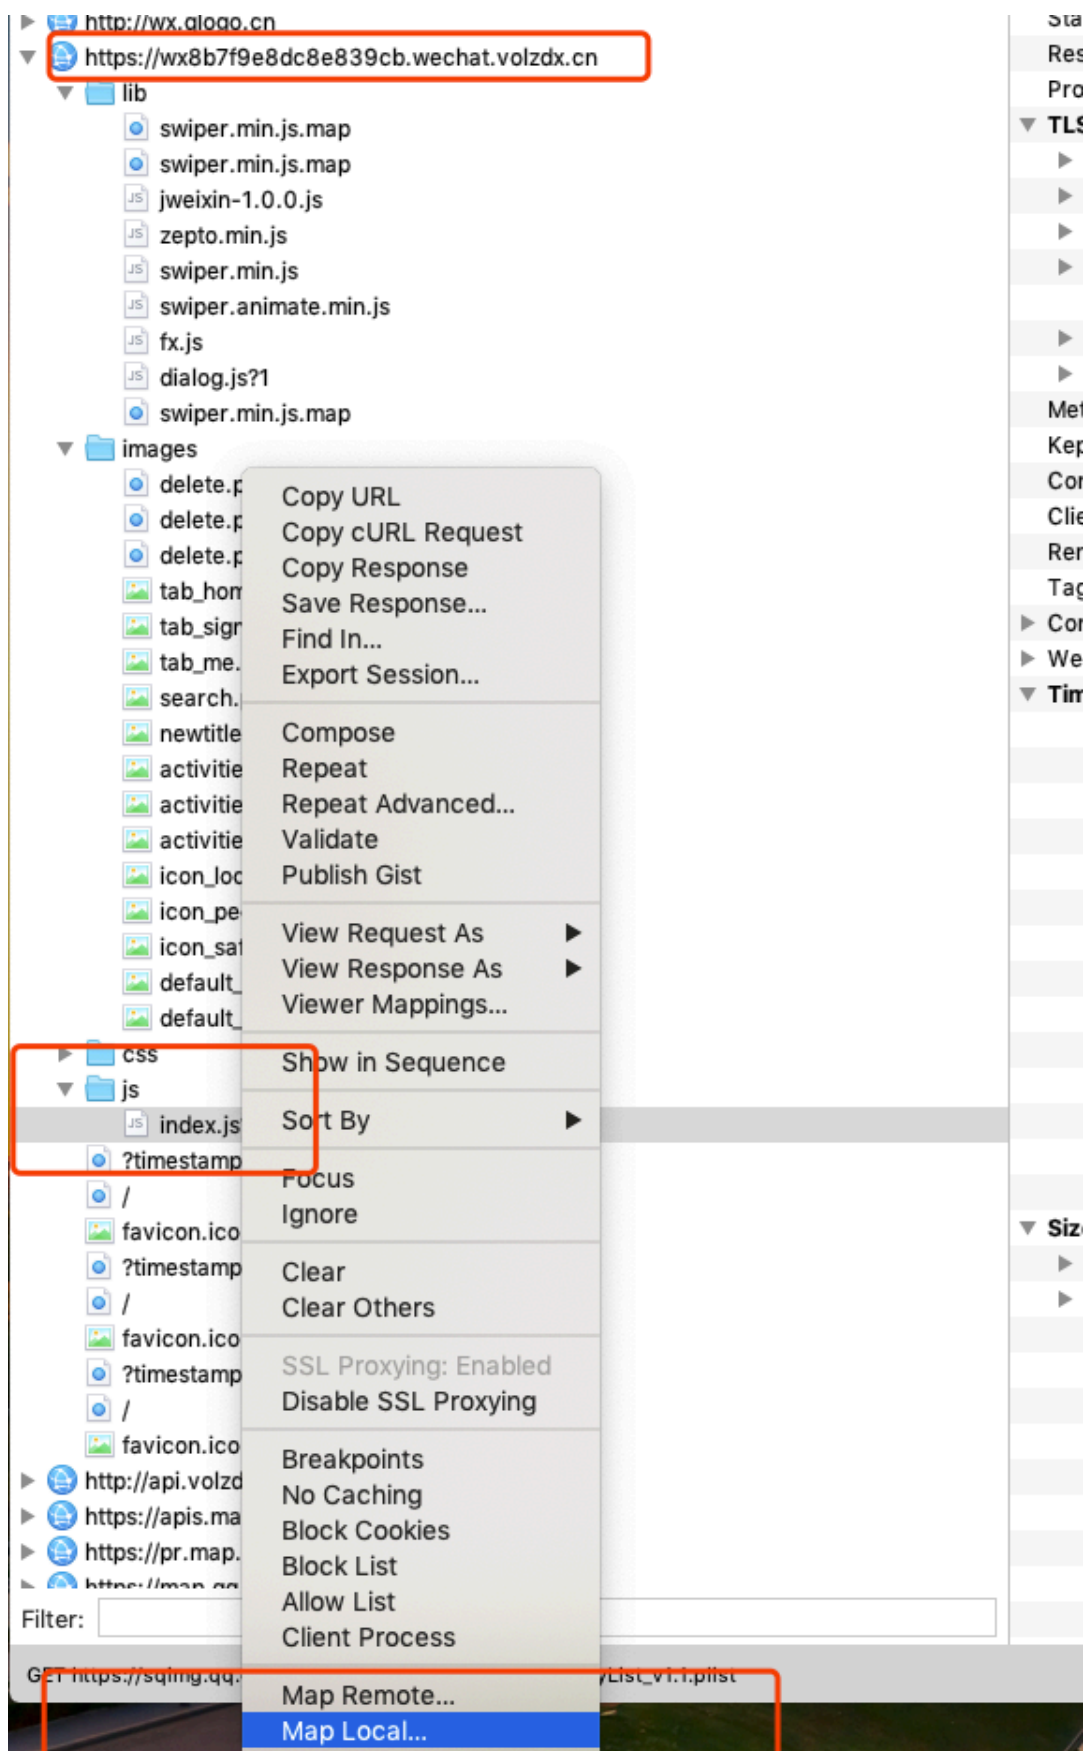

本篇以CRM为示范, 如果还拿上一个活码, 有点太不好意思了。啧啧, 放在本地nginx中也可以~~

1.打开charles,手机抓包设置不累述, 本以pc为列,前几步同4相同

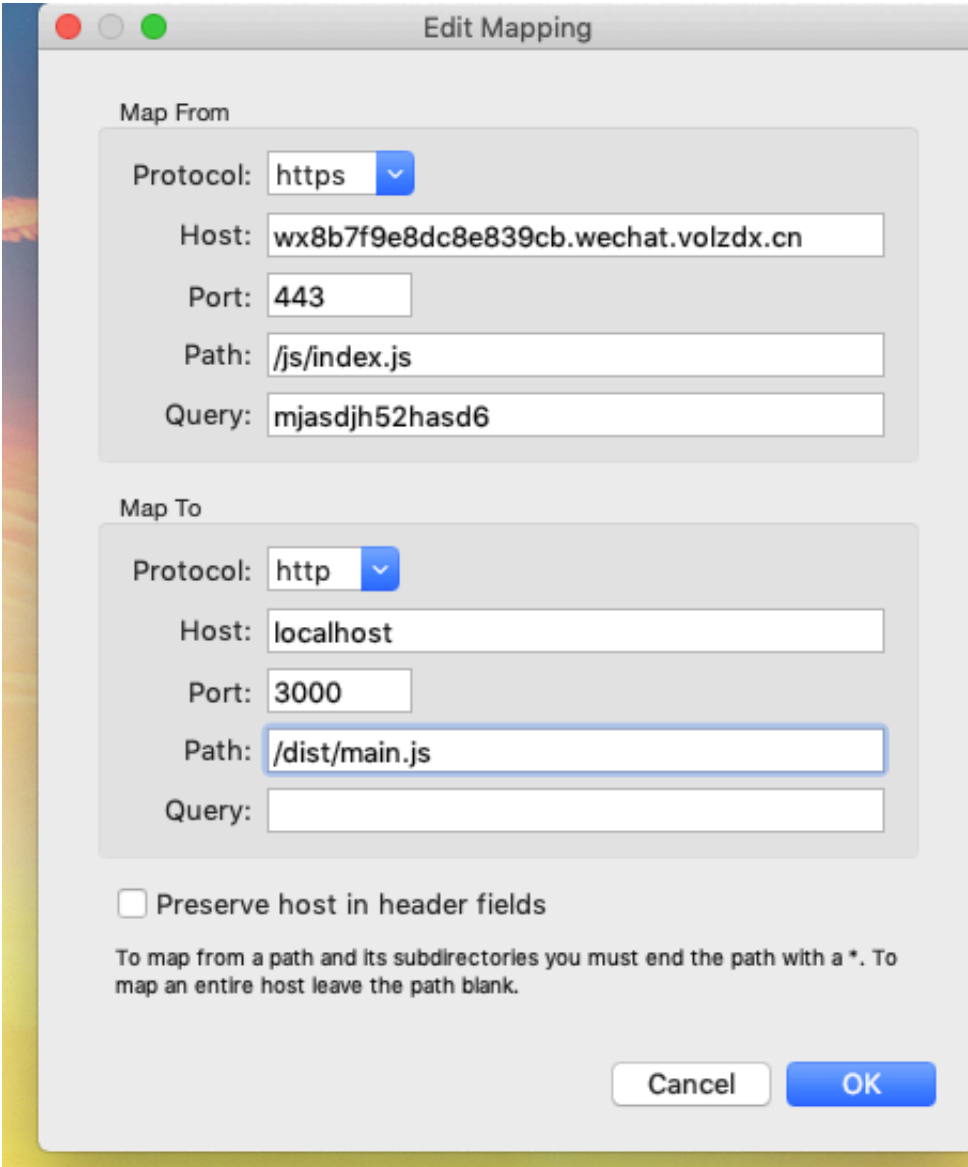

2.本地运行代码 (单页应用)

3.打开charles，找到

4.

A macOS-style dialog box titled "Edit Mapping". It contains two sections: "Map From" and "Map To". Each section has fields for Protocol, Host, Port, Path, and Query. The "Map From" section has Protocol: https, Host: wx8b7f9e8dc8e839cb.wechat.volzdx.cn, Port: 443, Path: /js/index.js, and Query: mjasdjh52hasd6. The "Map To" section has Protocol: http, Host: localhost, Port: 3000, Path: /dist/main.js, and Query: (empty). There is a checkbox for "Preserve host in header fields" which is unchecked. At the bottom right are "Cancel" and "OK" buttons.

4.

Edit Mapping

Map From

Protocol:

Host:

Port:

Path:

Query:

Map To

Protocol:

Host:

Port:

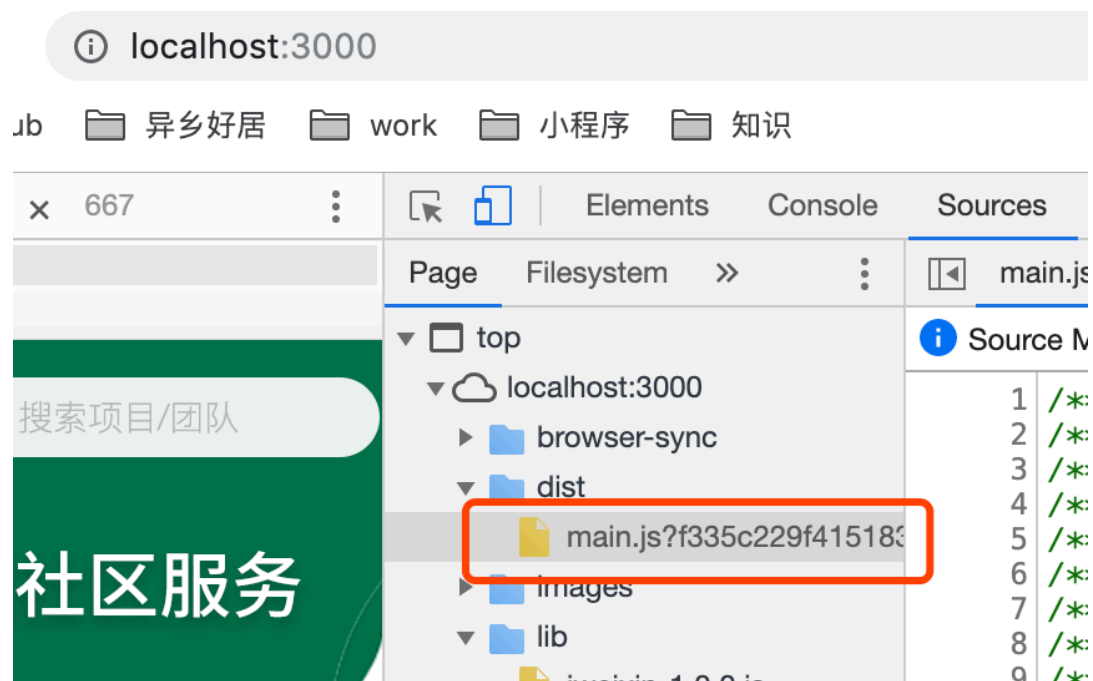

Path:

Query:

☐ Preserve host in header fields

To map from a path and its subdirectories you must end the path with a *. To map an entire host leave the path blank.

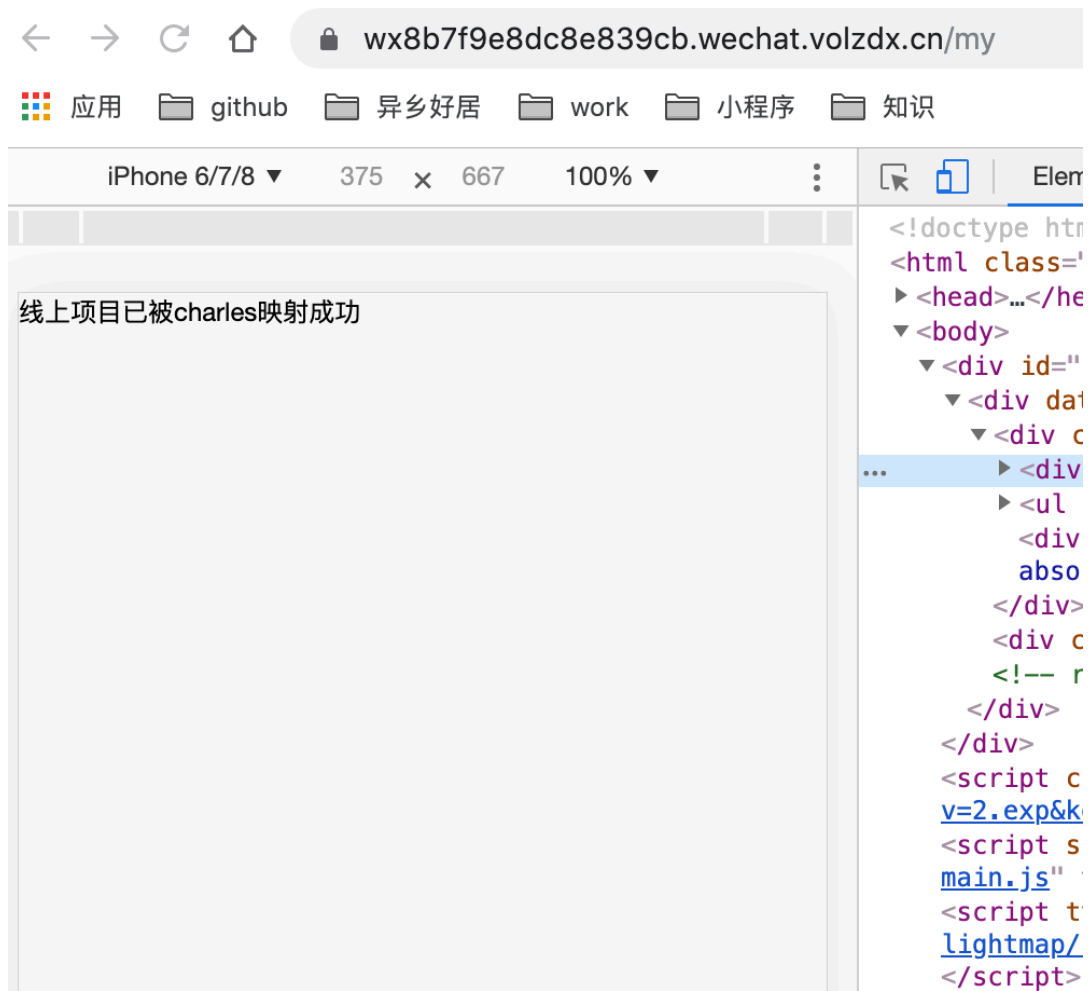

Cancel OK

5.测试

```
303 }
304
305 render() {
306   const { home } = this.props;
307
308
309   return <div>线上项目已被charles映射成功</div>
310
311
312
313
314   if (!home.data) {
315     return null;
316   }
317
318
319
320   return (
321     <div className="page-home">
322       <div className="page-home-header">
323         {this.renderHeaderBar()}
324         {this.renderSlick()}
325         {this.renderAnnounceComponent()}
326       </div>
```

6.浏览器刷新线上链接

7.至此成功了,可以开心的调h5在线bug了~
