

江山代有才人出，各领风骚数百年。

历经无数个畸形的变态项目需求,我活到了今天
然后我又差一点倒在其他项目组的接口中

长话不短说，有图有真相！

1.设计图：

<

选择设施

空间

家具

基本设施

选择设施

空间

家具

基本设施

看到这里,是不是很容易, 就是一个图片焦点切换而已嘛, 能给本大菜鸡难倒在历史的长河中?

如果真的是这样,那还OK的。可是, 因为这是多端统一的接口下发, 所以嘛, 咱得和人家看齐

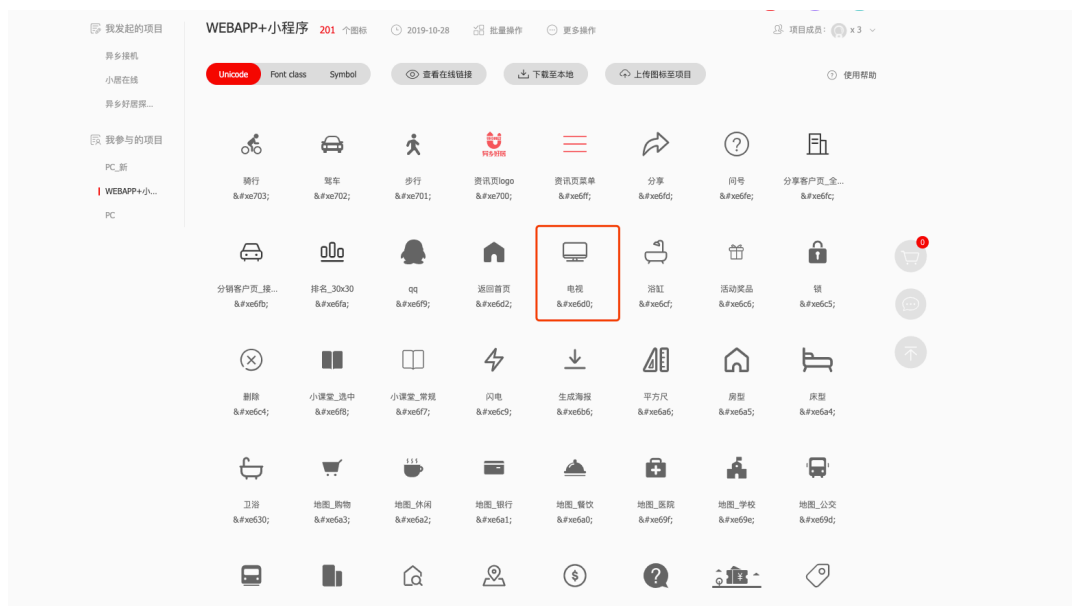

让我们看看接口先

```
▼ {error_code: 0, message: "成功", request_id: "b57ccab137ef21f40865afe07c546dd6",...}
▼ data: [{id: 21, name_lang: "基本设施",...}, {id: 28, name_lang: "家具",...}, {id: 31, name_lang: "空间",...}]
  ▼ 0: {id: 21, name_lang: "基本设施",...}

```

没错,接口下发的图片还是图片, iconfont代码片段还是代码

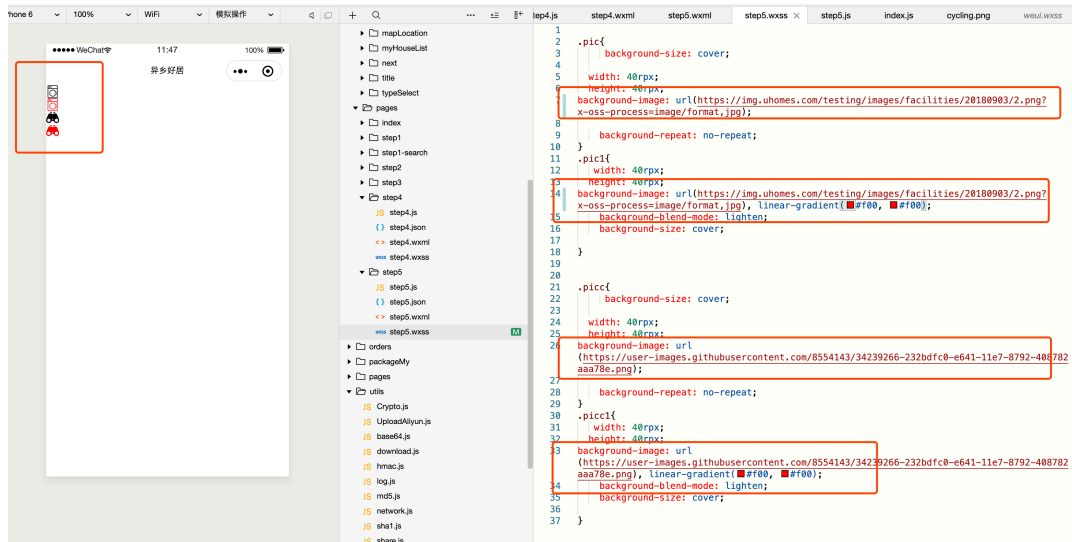

然而,人家现在现在做小程序, iconfont 项目, 微信小程序和H5用的不是一套!!!

纳尼~~

图标代码不一样,w我xxxooo!

去人家项目里将图标导出，再导入小程序项目里，会导致编码重新编译。
还好，天下才共一石，我独占1斗。亮有一计，保住了朕的大清~
废话不多说直接上代码

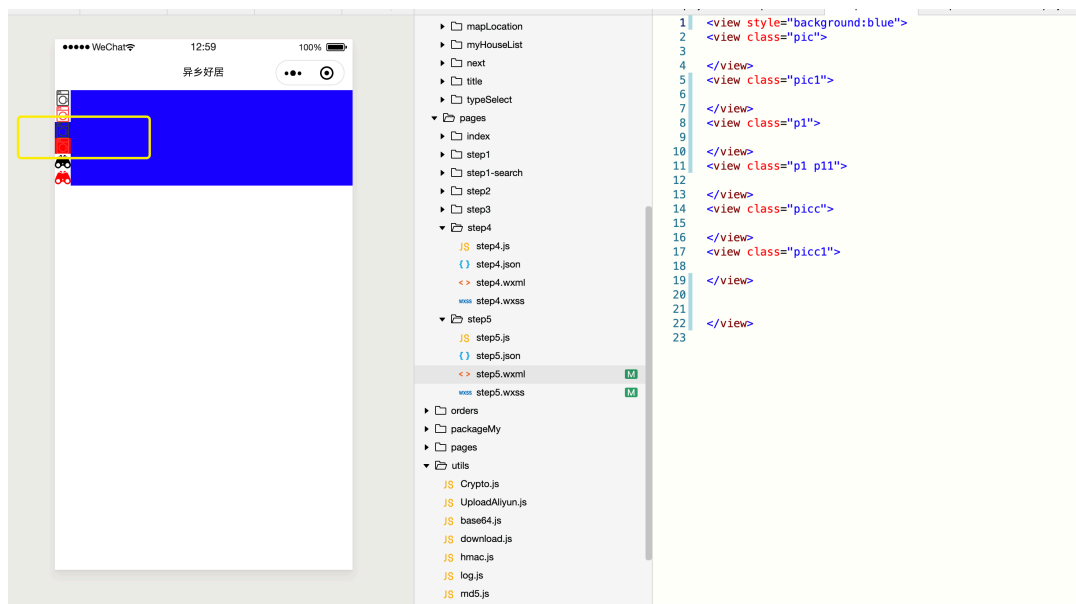

图是一个图,怎么就变sai了呢。好神奇鸭，小哥哥小哥哥，教教我好不好~
其实嘛，这个，嘿嘿，只有2个css就解决了~

利用 `background-blend-mode`，我们可以在图片下叠加多一层其他颜色，通过 `background-blend-mode: lighten` 这个混合模式实现改变图片主体颜色黑色为其它颜色的目的。

注意：使用图片一定要有颜色背景不然整个图片都变色了！！

如图

但是png不都是用透明背景图吗！！

这里就得感谢马爸爸了~

让我年纪轻轻20岁就有了人生的第一辆车=====>购物车

让我今天有了解决这个辣鸡需求的能力~~~~~

oss图片加个后缀变长png就有背景色了~?x-oss-process=image/format,jpg
